

Appendix 10

ORTHOTIC AND PROSTHETIC SERVICES

Coverage for financial assistance programs includes orthotic or prosthetic devices ("E" and "L" CPT codes) when need is directly related to qualifying medical condition. These items are available only from providers with valid purchase orders on file with DHEC. Current providers are listed below.

When need for orthotic or prosthetic device is determined:

1. Identify the vendor on the list below that can serve the family most conveniently;
2. Contact the provider to confirm that the requested item is in stock or can be ordered; and
3. Regional CSHCN offices are responsible for authorizing purchase according to established policy.

The reimbursement amount is based on the purchase order in effect on the date of services. Providers will be reimbursed the amount listed on these purchase orders.

Contact the Division CSHCN if you have questions about which providers or covered times.

Contracted Orthotic and Prosthetic Services Providers
